

Capacity Zone Peak Contribution Values

Calculated based on Daily Load Tags for 03/01/2010

The values in the table below are used in calculating a load serving entity's projected share of the Installed Capacity Requirement per Capacity Zone for the Capacity Commitment Period beginning June 2013. This calculation is required for purposes of Self-Supply in the Forward Capacity Market pursuant to Section III.13.1.6.1 of the ISO New England Transmission, Markets and Services Tariff.

Capacity Zone	MW
Maine ¹	1,606.879
Rest Of Pool ²	24,084.579

¹ The Maine (ME) Capacity Zone is the ME Load Zone

² The Rest of Pool Capacity Zone is made up of the New Hampshire, Vermont, Rhode Island, South East Massachusetts, Northeastern Massachusetts and Boston, West Central Massachusetts Load Zones, and Connecticut Load Zones
